

THE PROBLEM: THE AUTOMATION BIAS
The Crisis of Worker Anxiety

52% of U.S. workers fear AI will negatively impact their future employment prospects.

Automation vs. New Task Creation

Market Failures Hinder Progress

Innovation is currently skewed by pro-automation ideology and tax codes that favor machines over humans.

Pro-Worker AI: Moving from Job Replacement to Human Augmentation

Collaborative Innovation & Policy

Schneider Electric's "Superhuman" Technicians

Public Sector Leverage in Healthcare & Education

These sectors represent 24% of U.S. GDP, offering massive scale for pro-worker AI.

9 Pillars for a Pro-Worker Ecosystem

Key interventions include tax reform, intellectual property protection for expertise, and worker-led advisory councils.
