

AI at Work: The Shift from Individual Gains to Collective Intelligence

2024: The Era of Individual Productivity

40-60 Minutes Saved Daily

Enterprise users report significant daily time savings from using AI tools.

8x Increase in Enterprise Use

The use of tools like ChatGPT in businesses grow eightfold year-over-year.

Top Uses: Guidance, Research, and Writing

80%

Approximately 80% of all generative AI usage falls into these three categories.

2025: The Challenge of Collective Intelligence

The "Workslop" Problem Emerges

40% of employees receive inaccurate or incomplete AI-generated work, undermining productivity.

Early-Career Workers Face Pressure

Highly AI-exposed jobs saw an estimated 13% employment drop for workers aged 22-25.

Success Requires Trust, Not Mandates

- Adoption thrives with employee buy-in, psychological safety, and worker-centered design.
