

Call for Submissions

Algorithmic Society: The Journal of AI Ethics, Governance, and Societal Risk

HCI Academic Press • eISSN: 3144-511X

Algorithmic Society: The Journal of AI Ethics, Governance, and Societal Risk is pleased to announce an ongoing call for submissions. *Algorithmic Society* is a multidisciplinary academic publication dedicated to examining the profound ethical, governance, and societal challenges posed by artificial intelligence and algorithmic systems.

Our mission is to bridge scholarship across technology ethics, risk management, policy studies, and social science by connecting researchers, policymakers, technologists, organizational leaders, and civil society advocates in their efforts to ensure that AI is developed and deployed in ways that serve human flourishing and democratic values.

We welcome a wide range of submission types, including:

- Original research articles
- Review articles
- Literature reviews
- Research notes
- White papers
- Commentaries
- Case studies
- Policy analyses
- Risk assessments

Algorithmic Society prioritizes work that critically examines how algorithmic systems—in hiring, lending, healthcare, criminal justice, public services, and information ecosystems—reshape power relations, fairness, accountability, transparency, and individual agency, while offering constructive pathways toward responsible innovation. Our aim is to provide a publishing space that advances both critical analysis and actionable governance solutions for technologists, policymakers, organizational leaders, and civil society.

Through collaborative, interdisciplinary inquiry, *Algorithmic Society* amplifies scholarship that informs the development of AI systems that respect human dignity, promote equity, and enhance democratic participation. We welcome submissions from researchers, policymakers, practitioners, and advocates across computer science, philosophy, law, public policy, sociology, organizational studies, and related fields.

Submission Guidelines

Algorithmic Society accepts submissions on a rolling basis, and accepted articles are published open access. All submissions undergo a rigorous double-blind peer review process.

Detailed submission guidelines, including directions and the link for submitting your manuscript, are available at www.innovativehumancapital.com/submission-guidelines.

For any questions, please contact the Editor-in-Chief, Dr. Jonathan H. Westover, at jonathan.westover@innovativehumancapital.com.

We look forward to receiving your submissions and to publishing scholarship that advances AI ethics, governance, and the societal impact of algorithmic systems.
